

# Abdulrahman Mohammed Al-Gendari

## Full-Stack Developer

[Linkedin](#)[Github](#)[Gmail](#)[+967 775215708](#)

---

### Summary:

Creative and detail-oriented Front-End Developer with strong experience building dynamic, responsive, and user-friendly web applications using React.js, Material-UI, and modern JavaScript (ES6+). With a background as a Full Stack Developer (Django + DRF), I bring a deep understanding of backend integration, RESTful APIs, and end-to-end development lifecycles—allowing me to build seamless and scalable user interfaces that connect effortlessly to robust backends.

Skilled in translating UI/UX designs into high-performance code, managing component-based architectures, and maintaining clean, maintainable codebases. Passionate about building accessible, high-quality digital experiences and staying up to date with the latest in front-end technologies and best practices.

---

### Experience:

#### - Accountant

10 months

Waleed AL-matri For Trading

- Recorded and maintained daily journal entries with accuracy and in accordance with accounting standards.
- Managed sales and purchase transactions, ensuring proper documentation and classification.
- Tracked and reported on business expenses to support financial decision-making.
- Reconciled accounts and ensured accurate financial records for monthly and annual reports.
- Utilized accounting software (Excel - Onyx Pro ERP) to streamline financial operations and reporting.

## - Internship program

1 month

SABAFON, Yemen Company for Mobile Telephony

within Information Technology Department

And was briefed on functions of the following units within the above department:

Enterprise Applications

IT Systems Support

Operations

Service Desk

---

## Education:

### - University of Modern Sciences

Computer Information Systems (80.8)

---

## Projects:

### - Booking Management System

Freelance 2024

- Developed a web-based booking system for apartments and chalets using Django framework.
- Enabled customers to choose from various chalet packages based on service tiers.
- Managed customer accounts, bookings, invoices, and payment records with user-friendly admin controls.
- Implemented real-time booking and data updates using AJAX for smoother user experience.
- Integrated QR code functionality to allow clients to access and verify bookings securely.
- Generated automated reports for bookings, revenues, and customer data insights.
- Designed responsive front-end interfaces using HTML, Bootstrap, JavaScript, and AJAX.
- Used MYSQL for efficient data storage and queries.

## - Blog Platform

Personal Project

- Developed a blog system with a RESTful backend using Django REST Framework.
- Enabled user registration, authentication, and profile management via API.
- Allowed users to view articles, post comments, and interact with content dynamically.
- Implemented full CRUD operations for blog posts (create, update, delete) with permission restrictions.
- Applied robust authentication and authorization mechanisms to secure user actions.
- Designed a responsive front-end using HTML, Bootstrap, and JavaScript.
- Integrated the frontend with the backend API for dynamic content loading and interaction.
- Ensured data integrity and performance through efficient use of serializers, viewset, and pagination.
- Tested API endpoints using Postman to verify functionality, security, and error handling.

## - E-commerce Web Application

- Developed a full-stack e-commerce platform with React on the front-end and Django REST Framework on the back-end.
- Built a modern, responsive UI using React and Material UI (MUI).
- Utilized Redux for state management to handle cart state, user sessions, and API data across the application.
- Implemented core features such as product browsing, product detail view, shopping cart, and checkout process.
- Created secure authentication and authorization system using DRF token-based auth.
- Enabled user registration, login, profile management, and order history tracking.
- Developed admin APIs to manage products, categories, and customer orders.
- Integrated front-end with REST APIs using Axios for efficient data flow and real-time updates.

- Ensured clean architecture with reusable components and well-organized code structure.
  - Tested and debugged both front-end and back-end to ensure smooth user experience and API performance.
- 

## TECHNICAL SKILLS:

- Programming Languages: Python, JavaScript, SQL
  - Frameworks & Libraries: Django, Django REST Framework, React.js
  - API Technologies: REST, GraphQL, JWT authentication, Postman, WebSocket
  - Databases: PostgreSQL, MySQL, Redis
  - DevOps & Tools: Docker, Celery, Git, GitHub, CI/CD
  - Frontend: HTML5, CSS3, Bootstrap, TailwindCSS, AJAX
  - Soft Skills: Problem-solving, Creativity, Time Management, Communication Skills Computer
  - Science Foundations: Object-Oriented Programming (OOP), Data Structures
- 

## LANGUAGES:

- Arabic
- English
